# Areas of Irregular Figures

1. Below is a map of São Paulo State in Brazil. Each grid square represents 2,500 square miles. Estimate the area of São Paulo State.

I counted about \_\_\_\_\_ grid squares.

The area is about \_\_\_\_\_ square miles.

2. To the right is a map of Rio de Janeiro State in Brazil. Each grid square represents 2,500 square miles. Estimate the area of Rio de Janeiro State.

I counted about \_\_\_\_\_ grid squares.

The area is about \_\_\_\_\_ square miles.

**Practice**

3. \_\_\_\_\_ =  $73.04 + 15.67$

4.  $86.05 - 27.97 =$  \_\_\_\_\_

5. \_\_\_\_\_ =  $312.11 + 74.064$

6.  $57.1 - 39.002 =$  \_\_\_\_\_
